

Formed Parts

Formed Parts

We develop, design and manufacture formed parts in accordance with your individual specifications.

LANG+MENKE formed parts are used for example in:

- gearboxes
- clutches
- household appliances

The following are examples from our range of formed parts:

- retaining plates
- casings
- covering discs with a material thickness of up to 2 mm.

Materials used

Our manufacturing processes allow the following materials to be processed, for example:

- iron
- carbon steels
- aluminium

Designs

- side length: up to 160 x 160 mm

Hardening processes

The company's own hardening shop provides bainitic or martensitic hardening, depending on your requirements. Modern hardening processes, supported by automated technology, ensure the highest level of product quality.
